

HardyBerm Railroad Leak & Spill Portable Containment Berm

Ideal for shortline railroads and stations that do not require full-time rail containment systems, HardyBerm Railroad Leak & Spill Portable Containment Berms deploy quickly when needed and store compactly for their next use.

Made of durable PVC with flexible foam edges, these berms are sized to fit between and along the outer rails to capture leaks and spills that would otherwise lead to long, costly cleanups.

★ KEY FEATURES

- ✓ Fast installation and removal
- ✓ Captures 100-700 gallons
- ✓ Easy to clean

Product Number	Application	Size	Capacity (gal)	Magnets	Sold As
BERM3020-RRO	Outer Rail (Field)	30" W x 20' L x 4" H	124	One Side	Each
